Intern Software Engineer

Breadcrumbs Innovations Pvt Ltd Colombo

📅 11/2023 - 01/2024   📍 Colombo

SKILLS

| Java | Html | CSS | Javascript | Mysql | Mongodb | React.js | Angular | Laravel | PHP |

| Springboot | AWS |

PROJECTS

MERN Stack Job Portal Web App

📅 06/2024 - 08/2024

🔗 https://github.com/kjanuda/JOB4U

Tech Stack: Proficient in React, MongoDB, Node, Express.js, and Tailwind CSS.
Advanced Job Filtering: Built features to filter jobs by title, location, posting date, and more for precise search results.
User Authentication: Implemented secure sign-in options via email, password, and Google for a seamless experience.
Job Management: Developed functionalities for users to post, edit, and manage job listings efficiently.
Optimized UI and Pagination: Created a responsive, visually appealing UI with smooth pagination for enhanced user experience.

PROJECTS

Daily Task App

📅 11/2023 - 12/2023   📍 Location

🔗 https://github.com/kjanuda/Dailytaskapp.git

The goal of this project is to build a web application that allows users to manage their daily tasks and to-do lists. Users should be able to create, read, update, and delete tasks as need rooms .Tech stack-Laravel|MySQL|Bootstrap|HTML

Employee Management System

📅 03/2023 - 04/2023

🔗 https://github.com/kjanuda/EmployeeManagementANG.git

The Employee Management System (EMS) is a web application developed using Angular 15.01 for the front end, JSON Server for mock API data storage, for server-side functionality. Angular Material is utilized for an intuitive and responsive user interface, incorporating tables for displaying employee data. The system supports fundamental CRUD (Create, Read, Update, Delete) operations, along with robust search functionality."Tech Stack-Angular CLI: 15.0.1 | Json

Contact Book

📅 05/2023 - 06/2023

🔗 https://github.com/kjanuda/ContactBook.git

This system is created using MERN stack (MongoDB, ReactJS, NodeJS) within CRUD operations and according to MVC Architecture.
